Sandwell dental practice celebrates first birthday with weekend open day for the public

The Bridge Park dental practice, in the Great Bridge area of Sandwell, is marking its first birthday with an open day for local residents.

The NHS dental practice will have been open for 12 months on 14th February and has seen and treated over 3000 people during that time.

To celebrate the first year of opening, the Bridge Park dental practice is throwing its doors open between 1pm and 5pm on Saturday 18th February.

Everyone is welcome to come along and meet the dental team, have a tour of the dental surgery and get advice and information on looking after their teeth. Special activities will be on hand for children who can learn to brush their teeth with the practice's interactive dinosaur!

The Bridge Park dental practice is run by Primecare and provides NHS dental care in new state-of-the-art facilities. The dental team are experienced in caring for people of all ages and are specialists in helping people with a fear or phobia of dentistry.

Dina Hedges, Practice Manager, said:

"I am proud that we have reached this milestone and have been able to help so many people in the Sandwell area improve their oral health. Many people are not aware of the importance of visiting the dentist regularly. NHS dental care is even free for children and people on certain benefits so it's worth finding out how we can help you.

"I hope that many people will come along to meet us on 18th February and find out what's on offer. We take great care over all of our patients no matter what

your needs are and currently have spaces available for new NHS patients. You can be assured of a warm welcome from all the dental team.”

The open day is taking place in the dental surgery at unit 12, Great Bridge Street, West Bromwich, B70 0EN. For more details on the practice go to www.bridgeparkdental.co.uk
